

TOPIC / CONDITION: _____

BODY SYSTEM: _____

CATEGORY: _____

BIG PICTURE - WHAT IS GOING ON?

What is it? _____ Normal function → What changes? _____ Think: What normally happens, and what is different?

PATHOPHYSIOLOGY - CONNECT THE DOTS

CAUSE / TRIGGER → CHANGE IN BODY → EFFECT → SIGNS & SYMPTOMS

CAUSES & RISK FACTORS

Common causes:

Risk factors / triggers:

LABS & DIAGNOSTICS - WHAT DO I CHECK?

Labs / important values:

Diagnostics / tests:

What are we looking for? _____

TREATMENT / MEDICATIONS - HOW DO WE FIX IT?

Treatments / therapies:

Important medications:

Key nursing considerations: _____

CLINICAL + EXAM CONNECTIONS

Most important thing to remember:

Priority / NCLEX clue: _____ Connect to: _____

SIGNS & SYMPTOMS - WHAT WILL I SEE?

Common / expected findings:

Severe / worsening findings:

NURSING ASSESSMENT - WHAT DO I NEED TO WATCH?

Focused assessment:

Vital signs / trends:

What should I reassess?

PATIENT TEACHING - WHAT DO THEY NEED TO KNOW?

- _____
- _____
- _____
- _____
- _____

NURSING PRIORITIES & INTERVENTIONS - WHAT DO I DO?

1. _____
2. _____
3. _____
4. _____
5. _____

How will I know it is working?

RED FLAGS & COMPLICATIONS - WHAT AM I WORRIED ABOUT?

Priority / emergency findings:

Major complications:

MEMORY TRICK / QUICK NOTE
